1.0 Preface and Managerial Summary

This marine monitoring workplan has been compiled to answer a request for data from Dr K. Bond borne out of the market testing process.

The workplan is based on original returns from each region and national centre requirements. It is split into a number of basic categories. For each region the type of work and duration (given in boat days) are listed. Work category is given as Statutory, Surveillance or Permissive based on the business needs outlined in the National Marine Monitoring Strategy. Added to this is the boat type used for the work which is given as Type I, II, III or Contract.

There has been a certain degree of regional interpretation within the returns, we have worked hard to rationalize these differences. The outstanding differences are mainly confined to boat types. A number of vessels which could be classified as Type I were taken to be Type II by virtue of the fact that they are not permanently manned, but not based on size, cost or area of operation.

The workplan is by no means complete, for example small boat surveys tend to be specified on a shorter time scale and therefore could not be included in full detail. It can also be seen that the full implications of the Urban Waste Water Treatment Directive have not reached the survey stage in some regions.

The data has been presented in three different ways to help with the evaluation. Where figures seem not to add up reasons have been given in note form. The data can be reordered if required.

Nick Holden
Marine Monitoring Manager
4th of April 1995

Managerial Summary

1. Work Type Total for Each Vessel Category

	Work			
Boat Type	Statutory	Surveillance	Permissive	Total
I	235	256	705	1197
II	368	50	770	1188
III	978	98	1995	3071
C	231	12	139	382
Totals	1812	416	3609	5838

All Data in Boat Days

2. Work Type and Vessel Type Totals for Each Region

	Work								
Region	Statutory	Surveillance	Permissive	Total	I	II	III	C	Total
South West	701	93	1091	1885	167	284	1422	6	1879
North West	33	50	335	418	203	54	141	27	425
Southern	617	25	331	973	0	488	283	208	979
North/Yorks	32	55	238	325	249	3	73	0	325

TOTALS	1783	411	3614	5808	1228	1173	3071	302	5774

All Data in Boat Days

Managerial Summary

3. Work Type by Named Vessels

Region		Statutory	Surveillance	Permissive	Total
South West					
	Vigilance	60	89	18	167
	Contract	0	0	6	6
North West					
	Coastal Guardian	31	50	122	203
	Contract	1	0	26	27
Southern					
	Sea Ranger	63	14	62	139
	Contract	198	41	5	243
North/Yorks					
	Water Guardian	29	17	121	167
	Northumbrian Rivers	0	0	82	82
Anglian					
	Sea Vigil	101	100	228	463
	Contract	0	0	24	24
Thames					
	Thames Guardian	13	0	135	148

All Data in Boat days

Notes

It should be noted that these figures are based on data supplied to date by each region. Each survey program is expected to fill out as the survey season progresses.

A process of prioritisation and auditing is still to be carried out on the regional elements of this workplan.

There are some discrepancies between the totals of the three tables of this managerial summary. For example, the total for all boat work given as 5838 boat days in Table 1 does not agree with the total of work types given as 5808 boat days in Table 2. These errors may have been caused by the following factors;

-Some of the work does not fall in any of the Work Type categories, as an example Passage Time, Refit or Boat Training are entered in the programme but not in any specific work type category.

-In some cases the Boat Type to be used for a specific entry could not be specified. Consequently the number of days has been entered in the Work Type category but not in the Boat Type category.

-In a few cases work is to be carried out by Helicopter or Hovercraft. In these situations the work is entered in the Work Type category but not in the Boat Type category.

The work to be undertaken by Southern region does not include any use of Type I vessels. In this report, work carried out by the vessels; Sea Ranger, Sea Frog and River Guardian have been entered in the Type II vessel category.
