ENVIRONMENT
AGENCY

Introduction

Our aim is to protect and enhance the environment in a sustainable manner. We will work in partnership with local authorities and other interested parties, we will be business-like and make a real, positive difference to the environment for the benefit of the whole community.

This will be achieved by:

- Preventing and controlling pollution of land, water and

air, the latter in association with local authorities;

- Contributing to the cleaning up of contaminated land;

- Protecting people and property from flooding and providing effective flood warnings;

- Maintaining, developing and improving salmon, trout, freshwater and eel fisheries;

- Furthering nature conservation;

- Facilitating water-associated recreation;

- Providing an effective emergency service, 24 hours a day, 365 days a year, to respond to flooding, pollution incidents and fish kills.

The Environment Agency has eight regions covering England and Wales. The North East Region stretches from the Scottish border in the north to the Humber Estuary in the south, from the Pennines in the west to the North Sea in the east.
