Accession No ARQT.....

Compiled by Head Office
Corporate Planning Section, Bristol

ENVIRONMENT AGENCY
099464

Introduction

1. This document was compiled during the 1992/93 Corporate Planning round, to provide a consistent and accurate timetable of Catchment Management Planning between 1992/93 and 1996/97 for the 1993/94 Corporate Plan.

2. The main sources of information were Regional Plan Submissions, which were compared with the original list of 184 catchments; this list has moved on somewhat, and there are now 189 catchments (the Little Avon CMP will be produced jointly by Severn Trent and South West & Wessex, and has been counted as a ½ catchment in both regions).

3. As part of a pilot Statutory Water Quality Objective scheme, some Catchment Management Plans will now include SWQOs. The catchments involved have been indicated throughout this document by the use of italics. Information on SWQOs was provided by the Environmental Quality department.

4. Information has been presented in three ways:

   i) the table on pages 1 and 2 lists catchments alphabetically within Region;

   ii) the table on pages 3 and 4 lists catchments by scheduled plan completion date within Region;

   iii) the tables on page 5 onward list catchments with plans due for completion in a specific year and are paired with a map showing approximate catchment locations (these were obtained from the map 'River Quality 1990' which is part of the report 'The Quality of Rivers, Canals and Estuaries in England and Wales' produced in December 1991), except for 1996/97 and later years.

5. Please circulate this document to committees and sections in your Region as appropriate.

6. The information presented here will be revised in the 1993/94 Corporate Planning round in liaison with the Operations Directorate and Regions.

David Smith,
Corporate Planning,
Bristol Head Office.
