APPENDIX 1 - CATCHMENT MAPS

APPENDIX 2 - NRA DUTIES, POWERS AND TARGETS

1. INTRODUCTION

CATCHMENT ACTION PLANS are designed to be a simple, practical means of directing resources to achieve environmental improvements on a priority basis, between and within catchments. They set out the essential routine tasks, and a five year programme of specific actions for each catchment to meet regional and national targets. Changes may occur where unplanned work such as an extreme drought requires priority.

The NRA has inherited a legacy of environmental challenges arising from the use and abuse of our natural resources. Although significant progress has already been made it will be many years before all the work needed can be assessed, funded and carried out.

To achieve the environmental objectives will require not just the clear, vigorous direction of the NRA towards priority work but the help and support of the whole community.

The NRA has consulted with the Regional Advisory Board and Advisory Committees and the local interests about the draft action plans and the format is the outcome of those discussions.

Progress to achieve the Action Plan objectives will normally be reviewed on an annual basis but more frequently where severe problems have been identified.

ROUTINE SERVICES

Despite the fact that the NRA is largely a reactive, regulatory body it is possible to plan for much of the environmental protection work even the fact that unpredictable events will occur!

Much of the routine workload such as monitoring, enforcement of statutes and dealing with pollution and flooding incidents needs to have clear priority to ensure that it is dealt with to satisfactory standards throughout the region.

This essential work is carried out according to need in all catchments.

The NRA SW handles over 3000 pollution incidents a year, the majority of which are reported by members of the public. Many are attended within minutes and most within a few hours. In some cases major operations are undertaken to control the pollution and minimise impact on the environment.

Several thousand routine inspections of industrial premises, farms, weirs, fish passes and treatment works are also undertaken. In many cases improvements are required to minimise the risk of pollution or to ensure protection of fish and conservation of the water environment.

As part of the overall environmental protection exercise many flood defence schemes and thousands of planning applications are screened; hundreds of farm pollution grant proposals and effluent discharge applications are processed each year. Many new or varied abstraction licences and drilling consents are also processed to protect surface and underground waters.

Each year about 67,000 samples of rivers, lakes, ground and tidal waters and effluents are taken. Around 1.25 million chemical tests are made on these samples to ensure water quality standards are met and to identify where enforcement action is needed.

In addition detailed studies of samples of invertebrates, fish, algae and plants are undertaken to provide information on the status of the aquatic communities and to test the accuracy of the conclusions of chemical monitoring.

The key abstractions, discharges and monitoring sites for this catchment are marked on map(s) in Appendix 1.

Routine regulatory action is taken to ensure the conditions of thousands of discharges, abstractions and other legal requirements are enforced and illegal fishing is curtailed.

The NRA SW also handles many hundreds of letters and enquiries for information from the Water Act Register and provides press releases, reports and other information to a wide range of interests in the community.

3. CHALLENGES AND PROPOSED ACTIONS

The River Torridge has supported good brown trout, sea trout and salmon populations.

A decline in water quality associated with numerous pollution incidents was recognised during the early 1980's and systematic inspections of most farms and other premises in the catchment have taken place.

Despite this work fish stocks have not recovered and more detailed actions are now planned.

Functional officers have identified the main challenges to the achievement of environmental objectives. Where solutions are clear they have been programmed. In other cases further investigations are needed to determine the way forward.

ACTION	TIMETABLE					
	1991 1992 1993 1994 1995					
FISHERIES						
Enforce and monitor fixed net legislation						
Monitor sea fishing activity within estuary and determine any restrictions needed to protect migratory fish. Consider ban on drift netting.						
Increase estuary enforcement to maximise escapement of game fish.						
Enforce bass legislation	.					
Implement NLO of 14 nets.						
Compensate licenced netsmen not to fish for 5 years - linked to joint agreement.						
Re-define sea fishery limit at mouth of estuar to control trawling.	у					
Consider byelaw to contr	ol					

TIMETABLE

	1991	1992	1993	1994	1995	
Introduce mandatory bag limit for rod fishing.					-	-
Survey all weirs/fish passes. Plan and implement fish pass installation/improvements.						-
Repair Darkham fish pass.						
Consider improvements to fish passage at weirs in East/West Okement.						
Install new pass/trap/ counter at Beam and consider counter at Monkokehampton.						
Continue clearance of trash dams (Torridge, Waldon, Lew)				- -		_
Continue spawning gravel rehabilitation.						_
Assess best use of Meldon compensation water available for fisheries purposes.						
Annual juvenile surveys.			<u> </u>			_
Annual redd count.						-
Monitor movements of fish from Torridge estuary beyond Torrington intake using radio tracking.	Progra	amme to	be det	ermined		
Assess fish stocks downstream of forestry.						
Continue NRA/MAFF Torridge Investigation.	<u></u>					
Obtain brood stock annually and rear 10,000 - 20,000 parr for experimental stocking or emergency use in Torridge.						_

TIMETABLE

	1991	1992	1993	1994	1995
CONSERVATION					
Undertake environmental assessment on Weare Giffard, Kenwith Valley and Taddiport flood alleviation schemes. Design and implement environmental enhancement works.					
Undertake an environmental assessment of NRA river maintenance works and implement where possible the recommendations of the river corridor survey.				1.	
POLLUTION CONTROL					
Carry out review of water quality in the catchment.					
Followed by a Farm Campaign and Task Force programme of remedial action.					
Audit review and enforce ball clay and stone quarry discharges.		<u></u> _			
Ensure improved effluent treatment at Hatherleigh market and abattoir.			4		
Assess cause and where possible take measures to mitigate effects of acidic run-off in Okement catchment.					-
Assess impact of 1990 drought at 7 sites.					
Assess water quality impact of SWWS public supply proposals.			- -		
Carry out pollution risk assessment for Torrington potable supply intake.					

TIMETABLE

			1991	1992	1993	1994	1995
quali	ain automatic water ty monitors at wash and Torrington.			·		• -	
comming plant improve the i	cor progress of ssioning of treatment and quality ovements following ssue of consents to on Quarry.		.,	_			
	ss impact of worthy STW for consent ww					•	
Ford St. 0 Dolto Capit	scheme appraisal at and Fairy Cross, Siles in the Wood and on STW - part of SWWS al Improvement			<u></u>			
sewa	aisal of SWWS estuary ge scheme options and equent application.						
Deter	rmine deemed discharge ents.						
Assess impact of and remedial measures for landfill site at Deep Moor.						 -	-
surve	line water quality ey of groundwater to olish :						
(a)	suitability of potable use;						
(b)	extent of contamination by substances controlled by EC directives.						

ACTION	TIMETABLE					
	1991	1992	1993	1994	1995	
WATER RESOURCES						
Assess need for and impact of public water supply proposals and advise on licence conditions and operating arrangements for:						٠
(a) Torrington Intake;						
(b) Meldon Reservoir.						
Assess operation of hydro electro power releases at Meldon Reservoir.						
Review compensation release arrangements for Meldon Reservoir.						
Select site and construct gauging station in Upper Torridge.						
Construct gauging station at Jacobstowe (Okement).

NRA DUTTES AND POWERS

The Authority has statutory duties and powers in relation to water resources, pollution control, flood defence, fisheries, recreation, conservation and navigation along with various other functions given under the 1989 Water Act.

Whilst most of the Authority's duties and powers are exercised in respect of inland waters in England and Wales, it also has substantial responsibilities for the marine environment around the coast of England and Wales. For pollution control and fisheries purposes it has duties and powers out to distances of three nautical miles and six nautical miles respectively, the six miles being for salmonid protection. For flood defence it is responsible for a large number of sea defences (but not coastal protection which falls within the remit of local authorities).

As well as new duties, the NRA has also inherited other duties and powers under earlier legislation such as the 1963 Water Resources Act, 1975 Salmon and Freshwater Fisheries Act, and 1976 Land Drainage Act.

The Authority also has responsibility for implementing a number of Statutory Instruments, Orders, Notices and Directives relating to the 1989 Water Act. Various European Community Directives on the protection of the aquatic environment eg. Bathing Water Quality, Surface Water Quality, and Freshwater Fishlife also strongly influence its work.

NRA MISSION STATEMENT

The National Rivers Authority will protect and improve the water environment. This will be achieved through effective management of water resources and by substantial reductions in pollution. The Authority aims to provide effective defence for people and property against flooding from rivers and the sea. In discharging its duties it will operate openly and balance the interests of all who benefit from and use rivers, ground waters, estuaries and coastal waters. The Authority will be businesslike, efficient and caring towards its employees.

NRA AIMS

To achieve a continuing improvement in the quality of rivers, estuaries and coastal waters, through the control of water pollution.

To assess, manage, plan and conserve water resources and to maintain and improve the quality of water for all those who use it.

To provide effective defence for people and property against flooding from rivers and the sea.

To provide adequate arrangements for flood forecasting and warning.

To maintain, improve and develop fisheries.

To develop the amenity and recreation potential of waters and lands under NRA control.

To conserve and enhance wildlife, landscape and archaeological features associated with waters under NRA control.

To ensure that dischargers pay the costs of the consequences of their discharges, and as far as possible, to recover the costs of water environment improvements from those who benefit.

To improve public understanding of the water environment and the NRA's work.

REGIONAL PRIORITIES

The overall priority is to continue the improvements which were started in the last year in the following key areas.

WATER RESOURCES

- Develop regional strategy document.
- Improve response to licence applications.
- Establish Water Resources planning forum.
- Progress schemes to ameliorate low flows.
- Implement groundwater protection policy.

POLLUTION CONTROL

- Develop regional strategy document.
- Introduce charging for discharges scheme.
- Implement new consenting policy; begin review of deemed consents.
- Complete 1990/91 survey and consult on water quality objectives.
- Carry out EC Directive requirements.
- Introduce new monitoring programmes for effluents and controlled waters.
- Establish a regional laboratory service.

FISHERIES

- Develop regional strategy document.
- Review licence and other charging schemes.
- Harmonise stock assessment techniques.
- Extend programme of restoration and rehabilitation of fish stocks.
- Increase action to control illegal fishing.
- Submit new fishery byelaws to MAFF for confirmation.

RECREATION

- Continue implementations of Water Act Code of Practice.
- Produce strategy for regional sites.
- Improve cost recovery from the recreation service.

CONSERVATION

- Establish database for regulatory purposes.
- Produce strategy for regional sites.
- Promote conservation schemes.
